Mr. Shean Dalton
General Manager
Brushy Creek Municipal Utility District
16318 Great Oaks Drive
Round Rock, TX 78681

Re: Water and Wastewater Cost of Service and Rate Design Study

Mr. Dalton:

NewGen Strategies & Solutions, LLC is pleased to provide Brushy Creek Municipal Utility District with the enclosed report summarizing our findings and recommendations from the water and wastewater cost of service and rate design study.

We appreciate the opportunity to assist Brushy Creek Municipal Utility District in this engagement. In addition, we would like to acknowledge the excellent assistance we received from your staff. Without their support, this project could not have been completed. Please contact us if you have any questions concerning this report.

Sincerely,

NewGen Strategies and Solutions, LLC

SECTION 1

INTRODUCTION

Brushy Creek Municipal Utility District (District) retained NewGen Strategies & Solutions, LLC (NewGen) to conduct a cost of service and rate design study (Study) for the District's water and wastewater utilities. This report describes the analysis performed for the District and makes recommendations with respect to rates to be charged to the District's water and wastewater customers. This report consists of four sections as well as schedules, which supplement the findings in this report.

Background

As of 2021, the District provided service to approximately 5,700 retail water and wastewater connections as well as one wholesale treated water customer (Aqua Texas), one wholesale raw water customer (Williamson County), and transported (aka, wheeled) raw water on behalf of the City of Georgetown.

The District has two sources of water supply. The primary source is surface water in Lake Georgetown, but some supplemental water is supplied from groundwater wells located off Sam Bass Road. The surface water is provided under contract with Brazos River Authority (BRA). The contract allows for 4,000 acre-feet of surface water per year. The surface water is treated at the Brushy Creek Water Facility – a membrane filter plant opened in 2006.

The District operates and maintains a wastewater collection system consisting of approximately 250,000 liner feet of mains. All wastewater leaves the District and is treated at a wastewater plant operated by the Brushy Creek Regional Wastewater System, an entity owned by the District along with the Cities of Round Rock, Cedar Park and Leander.

Current Rates

The current retail rates are shown in Table 1-1. Although not shown in the table, the District also has special fixed charges assessed to retail customers located outside the District. NewGen is recommending these separate rates for outside District customers be eliminated so that these customers pay the same rates as customers inside the District, in part, due to the insignificant number of retail customers located outside the District.

The fixed charges are per living unit equivalent (LUE) and, therefore, increase the fixed charge with increasing meter size, which is consistent with industry best practice. Larger water meters can place greater demands on the water system and, thus, should pay a greater fixed charge to compensate the utility for the infrastructure put into service to accommodate this demand.

The water volumetric rate reflects a seasonal structure, where consumption in the four peak demand months of June through September are charged a higher volumetric rate than consumption in the rest of the year. The wastewater volumetric rate is assessed based on a winter average for all customers. The winter average is based on average water consumption during the months of November through February. Winter average billing is common for wastewater utilities and is intended to minimize the influence of irrigation (which does not return to the wastewater system) on wastewater bills.

The one wholesale treated water customer (Aqua Texas) is currently charged a fixed charge of \$4,750 per month plus \$2.12 per 1,000 gallons for all water consumption. After the first five years of the contract,

SECTION 1

which has passed, the rates charged to Aqua Texas can be adjusted to align with the results of a cost of service study, which must be provided to Aqua Texas along with notice to adjust rates.

The one wholesale raw water customer (Williamson County) is currently charged \$0.85 per 1,000 gallons of raw water supplied. The contract limits annual rate increases to the increase in the Consumer Price Index for All Urban Consumers-South Region. Notice must be provided to Williamson County as outlined in the contract in order to adjust the rate.

The City of Georgetown is currently charged a fixed charge of \$5,123.50 per month (termed a “Capital Charge” in the contract) plus a volumetric charge of \$0.17 per 1,000 gallons for all raw water wheeled on their behalf. The Capital Charge can only be adjusted based on a properly noticed change to the Maximum Rate of Delivery, as defined in the contract but, otherwise, remains unchanged. The volumetric rate may be adjusted based on specific parameters outlined in an exhibit to the contract and has a true-up provision.

The District has a policy of not charging itself for water or wastewater services.

**Table 1-1
Current Retail Rates**

Water

Fixed Charge per LUE (\$ per month)	\$ 15.00
Volumetric Rate (\$ per 1,000 gallons)	
On-Peak (June to Sept)	\$ 2.95
Off-Peak (Oct to May)	\$ 2.25

Wastewater

Fixed Charge per LUE (\$ per month)	\$ 6.00
Volumetric Rate (\$ per 1,000 gallons)	\$ 2.70

Note: does not include retail rates for customers outside the District

SECTION 2

REVENUE REQUIREMENT

This section of the report discusses the development of the revenue requirement forecast.

Revenue Requirement

NewGen reviewed historical financial results for prior fiscal years and developed a “Test Year” for the Study based on the fiscal year (FY) 2023 Budget. A Test Year is a common term in rate studies that refers to an adjusted fiscal year budget that is used as a basis for setting rates. The Test Year should be representative of recurring conditions, with adjustments for any unusual or one-time expenses or revenues. The development of the Test Year is shown in Schedule 2. The Brushy Creek Water Facility (BCWF) expenses (in cost center 525) relate to the intake and transportation of the raw water to the surface water treatment plant, treatment of the water, and placement of finished water in storage tanks. Distribution of the treated water is accounted for in cost center 500 (simply called “Water”). Cost center 550 captures the wastewater operations. In addition to these cost centers, the total cost of providing water and wastewater services includes a portion of shared services costs of the District to account for administrative and overhead support provided to the utility operations, including customer service and billing.

The Test Year was used to develop a five-year revenue requirement forecast for FY 2023 through FY 2027. The revenue requirement identifies the amount that should be recovered from rates in order to fully recover the cost of providing service. In addition to the Test Year, the revenue requirement forecast relies on inflation factors (as shown in Schedule 1) and debt service for the Series 2016 Utility System Revenue Note (as shown in Schedule 3). The revenue requirement forecasts for water distribution, BCWF, and wastewater are shown in Schedules 4, 5, and 6, respectively. Tables 2-1, 2-2, and 2-3 show summaries of the revenue requirement forecast over the five-year period.

Cash capital outlays in the Test Year, as shown in Schedule 2, are based on an average of FY 2020 Actual, FY 2021 Actual, FY 2022 Revised Budget, and FY 2023 Budget for recurring renewal and replacement capital needs plus the inclusion of certain discrete projects, such as the Wyoming Springs water line relocation project.

The revenue from wheeling raw water for the City of Georgetown was treated as a revenue offset for the BCWF, as shown in Table 2-2.

Debt Service	173,414	172,738	173,499	172,623	173,184
Total Cost	2,168,892	2,224,202	2,923,154	2,284,349	2,317,648
Less: Revenue Offsets	0	0	0	0	0
Net Revenue Requirement	\$ 2,168,892	\$ 2,224,202	\$ 2,923,154	\$ 2,284,349	\$ 2,317,648

Part of the increase in the BCWF revenue requirement through FY 2025, and then the decrease in the revenue requirement after FY 2025, is related to the financial obligations to pay for the ‘Phase 3 Pumps’

BRA project (as shown in Schedule 1). This obligation is forecasted to be satisfied by FY 2026 and, therefore, does not impact the FY 2027 revenue requirement.

Part of the increase in the wastewater requirement through FY 2025, and then the decrease in the revenue requirement after FY 2025, is related to the financial obligations to pay for required capital improvements as part of the contract with the City of Round Rock (as shown in Schedule 1). This obligation is forecasted to be reduced in FY 2026 to an assumed \$100,000 per year and, therefore, has a reduced impact on the revenue requirement starting in FY 2026.

Given the overall water revenue requirement is separated into a revenue requirement for BCWF and a revenue requirement for water distribution, it was necessary to develop a revenue requirement for the treated water service based on an appropriate combination of these functions. Tables 2-4 and 2-5 illustrate the treated water revenue requirement development. The details supporting Table 2-4 are provided in Schedule 7.

Table 2-4
Functionalization of the BCWF Revenue Requirement Forecast

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
BCWF Revenue Requirement					
Raw Water Common to All	\$ 1,844,713	\$ 2,072,093	\$ 2,518,696	\$ 2,047,394	\$ 1,954,504

	\$ 2,874,444	\$ 3,138,065	\$ 3,600,251	\$ 3,176,460	\$ 3,119,528

Table 2-5
Treated Water Revenue Requirement Forecast

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
Raw Water	\$ 1,779,239	\$ 1,998,931	\$ 2,430,226	\$ 1,975,848	\$ 1,886,326
Treatment	1,095,204	1,139,134	1,170,026	1,200,612	1,233,202
Water Distribution	1,637,079	1,714,499	1,756,620	1,798,656	1,843,143
	\$ 4,511,522	\$ 4,852,564	\$ 5,356,871	\$ 4,975,116	\$ 4,962,671

SECTION 2

The treated water revenue requirement was then classified using the base-extra capacity methodology. The results are shown in Table 2-6 and the details supporting the amounts shown in this table are provided in Schedule 8.

Table 2-6
Treated Water Base-Extra Capacity Results

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
Base	\$ 3,438,104	\$ 3,730,570	\$ 4,205,928	\$ 3,795,321	\$ 3,752,307
Extra Capacity	994,705	1,038,349	1,064,768	1,091,011	1,118,895
Customer	78,713	83,644	86,176	88,784	91,470
	\$ 4,511,522	\$ 4,852,564	\$ 5,356,871	\$ 4,975,116	\$ 4,962,671

Given the allocations to customer classes, as developed on Schedule 9 and applied on Schedule 10, Table 2-7 shows the treated water revenue requirement by customer class.

Table 2-7
Treated Water Revenue Requirement by Customer Class

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
Residential	\$ 3,215,016	\$ 3,457,396	\$ 3,814,102	\$ 3,545,824	\$ 3,538,087
Commercial	816,417	880,759	979,705	900,414	895,271
Irrigation	318,251	340,185	370,209	350,462	351,562
Wholesale (treated)	161,838	174,224	192,855	178,416	177,751
	\$ 4,511,522	\$ 4,852,564	\$ 5,356,871	\$ 4,975,116	\$ 4,962,671

SECTION 3

RATES

This section of the report discusses the projected cost recovery under current rates as well as proposed rates designed to recover the revenue requirements for the utilities.

Assumed Billing Units

The District is close to fully built-out and, thus, customer growth is limited. With guidance from the District's engineer, NewGen assumed customer growth over the next five years to be limited to one new retail residential connection per year and three new commercial 1.5-inch water meter connections per year (inclusive of a potable water connection plus an irrigation connection) from FY 2023 through FY 2026 and then just one additional commercial connection in FY 2027.

NewGen evaluated the water consumption in FY 2019, FY 2020, and FY 2021 to identify reasonable consumption on which to base proposed rates. All three fiscal years exhibited weather that was drier (i.e., less precipitation) than in a "typical" year, which was assumed to be 37.3 inches of precipitation annually and 12.7 inches of precipitation in the months of June through September (the peak months for irrigation). FY 2021 was ultimately selected as the 12-month period most representative of expected consumption given it was the most recent 12-month period evaluated and it was within five inches of the "typical" precipitation in the peak irrigation months of June through September.

The only meaningful adjustment to this assumed consumption was the removal of the irrigation volume associated with Cat Hollow HOA, as they intend to replace the grass in their medians with xeriscaping. As with any water utility, the utility would be expected to under-recover projected revenue in a year with significantly more precipitation, especially in the summer months. This is part of the reason for having sufficient fixed charges on the water utility – to ensure sufficient revenue stability in "wet" years.

Recovery Under Current Rates

The current rates are projected to under-recover the revenue requirement in the five-year forecast. The results of this projection are shown in Table 3-1.

SECTION 3

Table 3-1
Revenue Recovery Under Current Rates

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
Water (Raw and Treated)					
Revenue Requirement					
Water Distribution ¹	\$ 1,637,079	\$ 1,714,499	\$ 1,756,620	\$ 1,798,656	\$ 1,843,143
BCWF ²	2,939,918	3,211,227	3,688,722	3,248,006	3,187,706
Raw and Treated Revenue Req	\$ 4,576,996	\$ 4,925,726	\$ 5,445,342	\$ 5,046,662	\$ 5,030,848
Projected Revenue	3,426,704	3,444,407	3,462,110	3,479,814	3,486,027
Over-(Under) Recovery	\$(1,150,292)	\$(1,481,319)	\$(1,983,232)	\$(1,566,848)	\$(1,544,822)
Wastewater					
Revenue Requirement ³	\$ 2,168,892	\$ 2,224,202	\$ 2,923,154	\$ 2,284,349	\$ 2,317,648
Projected Revenue	1,841,614	1,848,073	1,854,533	1,860,992	1,863,323
Over-(Under) Recovery	\$ (327,279)	\$ (376,129)	\$(1,068,621)	\$ (423,357)	\$ (454,325)
Combined Over-(Under) Recovery	\$(1,477,571)	\$(1,857,448)	\$(3,051,853)	\$(1,990,205)	\$(1,999,147)

Notes:

- 1) Table 2-1
- 2) Table 2-2
- 3) Table 2-3

The under-recovery indicated under current rates is not sustainable in the long-run and rate adjustments are appropriate to resolve the long-term under-recovery that would threaten the financial integrity of the utilities.

Proposed Retail Rates

NewGen recommends the retail rates shown in Table 3-2. The proposed rates reflect increases in the fixed charges and volumetric rates for retail customers. The proposed rates maintain the existing rate structure (e.g., seasonal volumetric water rates), as this structure seems to be aligned with the District's policy goals. However, given the existing rates charged to the District's wholesale treated water customer (Aqua Texas) are generally aligned with the identified cost of providing service to this customer, no change in the rates charged to this wholesale customer are recommended at this time.

Table 3-2
Proposed Retail Rates

Water	
Fixed Charge per LUE (\$ per month)	\$ 20.00
Volumetric Rate (\$ per 1,000 gallons)	
On-Peak (June to Sept)	\$ 4.60
Off-Peak (Oct to May)	\$ 3.40
Wastewater	
Fixed Charge per LUE (\$ per month)	\$ 9.00
Volumetric Rate (\$ per 1,000 gallons)	\$ 3.10

Note: Proposed rates are the same for the retail customers outside the District

Proposed Rate Recovery

The revenue recovery under the proposed rates is summarized in Table 3-3. The over-recovery forecasted in FY 2023 and FY 2024 under the proposed rates will offset the expected peak in the water revenue requirement in FY 2025 due to the BRA ‘Phase 3 Pumps’ project as well as the peak in the wastewater revenue requirement in FY 2025 due to the required capital improvements associated with the City of Round Rock contract. Thereafter, the proposed rates approach full cost recovery in FY 2026 and FY 2027.

SECTION 3

Table 3-3
Revenue Recovery Under Proposed Rates

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
Water (Raw and Treated)					
Revenue Requirement					
Water Distribution ¹	\$ 1,637,079	\$ 1,714,499	\$ 1,756,620	\$ 1,798,656	\$ 1,843,143
BCWF ²	2,939,918	3,211,227	3,688,722	3,248,006	3,187,706
Raw and Treated Revenue Req	\$ 4,576,996	\$ 4,925,726	\$ 5,445,342	\$ 5,046,662	\$ 5,030,848
Projected Revenue	4,919,919	4,946,993	4,974,067	5,001,141	5,011,340
Over-(Under) Recovery	\$ 342,923	\$ 21,267	\$ (471,275)	\$ (45,521)	\$ (19,509)
Wastewater					
Revenue Requirement ³	\$ 2,168,892	\$ 2,224,202	\$ 2,923,154	\$ 2,284,349	\$ 2,317,648
Projected Revenue	2,282,260	2,290,081	2,297,903	2,305,725	2,308,553
Over-(Under) Recovery	\$ 113,367	\$ 65,879	\$ (625,251)	\$ 21,376	\$ (9,095)
Combined Over-(Under) Recovery	\$ 456,290	\$ 87,146	\$ (1,096,526)	\$ (24,145)	\$ (28,603)

Notes:

- 1) Table 2-1
- 2) Table 2-2
- 3) Table 2-3

The volumetric revenue forecast for the water utility assumes perfectly inelastic demand (i.e., no reduction in water demand as a result of increasing rates). Significant changes in customer behavior in response to water rate increases could cause the water utility revenue to be less than forecasted.

Bill Comparisons

Table 3-4 shows the bill impact for a hypothetical average residential customer and Table 3-5 provides some benchmarking information for residential customers.

Table 3-4
Residential Bill Impact Under Proposed Rates

	Meter Size/Gallons	Current	Proposed	Increase \$	Increase %
Water On-Peak Month					
Fixed	5/8-inch	15.00	20.00	5.00	33.3%
Volumetric	11,000	32.45	50.60	18.15	55.9%
		47.45	70.60	23.15	48.8%
Water Off-Peak Month					
Fixed	5/8-inch	15.00	20.00	5.00	33.3%
Volumetric	9,000	20.25	30.60	10.35	51.1%
		35.25	50.60	15.35	43.5%
Wastewater					
Fixed	5/8-inch	6.00	9.00	3.00	50.0%

		22.20	27.60	5.40	24.3%
Annual Average Bill		61.52	84.87	23.35	38.0%

Table 3-5
Average Combined Residential Water and Wastewater Bills

BCMUD Current	61.52
BCMUD Proposed	84.87
Georgetown	71.63
Round Rock	73.08
Fern Bluff MUD	75.10
Cedar Park	87.08
Leander	112.95
Austin	128.80
Hutto	144.97
Pflugerville	145.67

Note: Benchmarking based on a residential customer with a 5/8-inch water meter; 11,000 gallons of water consumption in June through September and 9,000 gallons of water consumption in the remaining months; and 6,000 gallons of billed wastewater flow. Note: The other utilities do not have seasonal water rates.

Alternative Retail Rates

As indicated in Table 3-3, the proposed rates are forecasted to modestly under-recover the overall cost of service over the five-year forecast. If the District would prefer to eliminate any forecasted under-recovery over the five-year forecast, it could adopt the rates shown in Table 3-6, reflecting an additional \$0.10 per 1,000 gallons on each volumetric rate.

Table 3-6
Alternative Retail Rates

Water

Fixed Charge per LUE (\$ per month)	\$ 20.00
Volumetric Rate (\$ per 1,000 gallons)	
On-Peak (June to Sept)	\$ 4.70
Off-Peak (Oct to May)	\$ 3.50

Wastewater

Fixed Charge per LUE (\$ per month)	\$ 9.00
Volumetric Rate (\$ per 1,000 gallons)	\$ 3.20

Note: Proposed rates are the same for the retail customers outside the District

The alternative rates in Table 3-6 would result in the forecasted recovery shown in Table 3-7.

Table 3-7
Revenue Recovery Under Alternative Rates

SECTION 4 POLICY ISSUES

This section of the report mentions policy issues that inform the Study or may be relevant for possible further examination.

Utility Basis Revenue Requirement

It is common for public entities, such as the District, to develop utility revenue requirements on the cash needs basis, which was used for the Study. However, it is informative to understand how the utility's revenue requirement would compare under the utility basis, which is the method most often used by investor-owned utilities. To this end, NewGen has developed a high-level assessment of the overall revenue requirement for the District's water utility under the utility basis. This was developed for comparison purposes and does not impact the rates proposed in Section 3. Further, the analysis only includes assets owned by the District and does not include assets that are used to provide the District service but are owned by a different entity (e.g., BRA or the City of Round Rock).

Table 4-1 summarizes the high-level development of rate base for the water utility as well as an implied return.

**Table 4-1
Water Rate Base and Return**

	FY 2021
Original Cost of Utility Plant	\$ 60,824,864
Plus: Cash Working Capital ¹	281,826
Less: Accumulated Depreciation	<u>(37,427,152)</u>
Rate Base	\$ 23,679,537
Rate of Return on Rate Base ²	5.0%
Implied Return	\$ 1,183,977

Notes:

- 1) Developed based on 1/8th of FY 2021 Actual cash O&M
- 2) Assumed

Table 4-2 summarizes the overall water revenue requirement under the utility basis. The indicated revenue requirement under the utility basis is greater than the average cash basis revenue requirements for FY 2023 through FY 2027 (as shown in Table 4-3).

SECTION 4

Table 4-2

Table 4-3
Cash Basis Water Revenue Requirement

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	Average
Water Distribution ¹	\$ 1,637,079	\$ 1,714,499	\$ 1,756,620	\$ 1,798,656	\$ 1,843,143	\$ 1,749,999
BCWF ²	2,939,918	3,211,227	3,688,722	3,248,006	3,187,706	3,255,116
	\$ 4,576,997	\$ 4,925,726	\$ 5,445,342	\$ 5,046,662	\$ 5,030,849	\$ 5,005,115

Notes:

- 1) Table 2-1
- 2) Table 2-2

Private Fire Protection

The District provides approximately a dozen private fire protection connections to the water system for the benefit of commercial customers. To be clear, these are not the hydrants located throughout the District, which would be considered public fire protection. These are private connections to the water system that only serve to suppress fire in the commercial structures that have these connections. While there is not anticipated to be a demand on the water system under normal conditions, the utility is incurring costs given the level of infrastructure it must provide to meet the potential demand. Thus, there is a cost being incurred to provide the stand-by service.

What fixed charge to assess to private fire connections (or whether to charge them at all) is a question that is well suited to policy input from the governing body. Some utilities do not charge a fixed monthly charge for these connections, in part, because they are not intended to place demands upon the water system unless there is an emergency event. Further, the presence of private fire protection could, in theory, reduce the ultimate water needs required to extinguish a fire because private fire protection is generally able to activate before fire personnel arrive at the scene, therefore potentially extinguishing the fire before it spreads or minimizing the spread. However, the private fire connection is a service – one

that primarily accrues to the benefit of the commercial property owner. Typically, the property owner will pay reduced insurance rates due to the presence of a private fire connection. Therefore, some utilities choose to charge private fire connections a fixed monthly charge. This fixed charge might be the same as would be assessed to any other connection to the water system of similar size or might be a fee developed specifically for private fire connections, such as a fee that results from the implementation of the Maine Formula as outlined in American Water Works Association (AWWA) M1 Manual, *Principles of Water Rates, Fees, and Charges*.

The District's current practice is not to charge these connections a monthly fixed charge. Given the small number of connections, the financial ramifications of this policy are insignificant. Therefore, continuing this practice, if desired, seems reasonable, but the District should confirm that its rate tariff aligns with this practice. Currently, the rate tariff does not seem to address this issue.

Enterprise Fund

Many cities, districts, and other public owners of water and wastewater utilities choose, or are compelled, to operate the utilities as enterprise funds. This means the utilities are managed outside of the general fund and, therefore, have segregated reserve balances and are operated as stand-alone businesses. Further, although it is common and appropriate for the utilities to transfer funds to the general fund for their share of shared services costs (e.g., administration, billing, human resources, etc.) and perhaps a return or dividend as compensation for the risk inherent in owning and/or operating the utilities, it is industry best practice to avoid burdening the utility with support for unrelated activities (such as parks). The revenue requirement in this Study has generally been developed consistent with the concept of the utilities being enterprise funds even though the utilities are within the District's general fund. The District might consider the advantages and disadvantages of formally making the utilities enterprise funds. One advantage of this approach is that it may make the utilities easier to manage given the assets and liabilities of the utilities will be separate and distinct from the general fund and, therefore, allow for a clear picture of the overall financial health of the utilities.

Another related consideration would be whether to charge the District's water and wastewater accounts for these utility services. Currently, the District does not charge itself for water or wastewater services. However, within a true enterprise fund, it would be appropriate for the District to pay the water and wastewater enterprise for these services.

Notes:

- A Test Year is based on average of FY 2020 Actual and FY 2021 Actual
- B Test Year is based on average of FY 2020 Actual, FY 2021 Actual, FY 2022 Revised Budget, and FY 2023 Budget
- C Allocation based on revenue requirement (without debt service or revenue offsets)
- D Removed non-recurring expense from Test Year
- E Removed from analysis
- F Remaining revenue is from wheeling raw water for Georgetown (as offset to revenue requirement)
- G Wyoming Springs water line relocation project
- H One-time capital expense for revised Lead and Copper Rule compliance
